

GRACE, ENERGY AND LIGHT

© C. S. Craig

The Late Chester McCalley, the great Linguist of the Original Languages and Expository Teacher, in his book entitled “The Foundations of Our Great Salvation,” wrote the following about the Grace of God: “The more Grace is used, the more it increases. Appropriating God’s Grace is like having your bank account increase every time you withdraw money.” (See John 1:16, “Grace upon Grace”). He went on to say: “Grace is exchanged for Grace; it is never depleted; it is experienced but never exhausted.”

The Grace of God, like the Word of God is absolutely awesome! The Word of God, like Grace, is inexhaustible. God’s Love is inexhaustible. God’s Power is inexhaustible. God is omnipotent which of course means all powerful. God is Light and light is energy. Energy is inexhaustible. Science has not determined the exact nature of light. However, in “Light of Scripture,” I would define light as: (1). “a phenomenon, the existence of which is independent of theory, defying an exact explanation except in God’s Word;” (2). “Light is the transfer of immaterial, invisible particles to visible immaterial particles and this transition occurs by a continuous action from the source of light which is God.” (3). “Light is - light be!” (4). “A higher form of life from which existence flows.” (5). “The very nature and breath of God.” (6). All words have their root in God’s breath which freely flows from the Light of His Eternal Being for the benefit of His Creation.

Science has determined that light is composed in part by Ether a supposed medium filling all known space even within the densest bodies. Electricity is a form of energy. Energy is everywhere and cannot be destroyed or exhausted. Light cannot be destroyed. Therefore, I conclude that Light, Energy, Grace, Hope, Life, Beauty, Love, Knowledge and Wisdom (God’s Word), all flow from God and are an extension of His eternal self existence. We exist because He exists! Life and all life forms exist because He exists.

Science denies God, therefore, the search for the cause and effect of life and the cosmos is away from God rather than toward God. Because everything flows from God, science needs to do an about face and begin to swim up stream toward God. Only then will their thirst for light be filled. Until science gives God credit, God will let them go with the flow away from the very knowledge they seek. Their search for the source of light and energy is a path that follows a circle around God and they are looking outward rather than inward. The paths that science must follow are clearly marked by the footprints of Eternal God. Science, might I suggest, has breathed too much Ether. The result of course is a walk in darkness as anyone who has been

under ether for surgery can attest.

Christ came as the King of the Jews, but was rejected. In mockery his murderers posted a sign over his head on his cross that said “This is Jesus King of the Jews.” They mocked that “he can save others, but he can’t save himself.” In their folly they told the truth unknowingly. Christ would not save himself so that He could “save others,” He died for all that all might be saved. God takes all men in their own arrogance. God always turns cursing into blessing – Christ was cursed as He hung on the Cross. But, His cursing and death turned cursing into salvation for the world – a world that rejected Him, mocked Him, spit in His face, scourged Him, and Crucified Him. By His death came our restored life. Christ, in his humanity, died King of the Jews. He rose the King of Kings and Lord of Lords forever.

God’s Grace, God’s Light and God’s Energy, since the Creation has constantly flowed into Creation. God became incarnate (physically manifested Himself) to His own Creation and his own received Him not. The power of evil is the blindness of arrogance. The blindness of arrogance shall live the agony of eternal separation from God’s Grace, God’s Light and God’s Energy. In closing may I say that God’s laughter shall be heard from Heaven - God will have the last laugh – in the finality of the end. Amen. Even so, come Lord Jesus.
